Bilateral Meetings

- I confirm to participate in b2b sessions block 1 on Thursday 10:30-12:10
- I confirm to participate in b2b sessions block 2 on Thursday 12:10-13:50

Description

We build very light and powerful electric drive solutions for ships up to 60m. The drives are inboard engines and can replace any combustor due to the realized speed directly. Whether mounted on a Z-drive, in an external motor housing or on a jet propulsion system, this is just as possible as mounted on a shaft. The power range is currently 50-150 KW continuous power.
