Bilateral Meetings

- I confirm to participate in b2b sessions block 1 on Thursday 10:30-12:10

Description

We help you treat water right.

We are independent water specialists for the marine industry. Ankron Water Services consists of an interdisciplinary team of qualified engineers and natural scientists with an extensive experience in the water industry for several years. Marine water areas such as ballast and bilge water are covered as well as drinking and wastewater. We offer consolidated know-how in water treatment, approval procedures as well as research and development. We test, advise and participate actively in the approval of your devices or systems. In doing so we use our global network to support you in solving all your water queries.

Ankron consists of an experienced team with multidisciplinary expertise in maritime and land-based water technology. The aim of Ankron is to offer high-quality consulting and services based on experience, knowledge and a globally established network. We can finalize your projects successfully by applying a selective combination of engineering and science.

Our main fields of business are:

- Consulting
- Testing
- R&D
- Advisory
