Bilateral Meetings

- I confirm to participate in b2b sessions block 1 on Thursday 10:30-12:10

Description

We support associations, companies, ministries and local authorities in strategic foresight processes. Our focus is on innovation design, future analyses, supply networks, digitisation and change - usually coupled with a medium- to long-term approach, a 360° perspective and a participative process with workshops and seminars. A new focus of our consultancy are the futures and innovations of Subsaharian-Africa. Some people call us futurists, but we are realists with fantasy, imagination and passion. We are founding member of the Advanced Foresight Group, which offers a full range of services on future, innovation and market entry as a one-stop shop (<http://advanced-foresight.com>).
