Bilateral Meetings

- I confirm to participate in b2b sessions block 2 on Thursday 12:10-13:50

Description

Material Research and Product development for Maritime Purposes. Phi-Stone was founded by several Scientists and Engineers in 2012.

The spectrum of our areas of interest is remarkably broad and ever increasing.

Next to scientific consultation, our main competences can be found in the field of process- and product-development. Here, we focus on individual solutions for each customer in order to find targeted and efficient solutions.

Our current focus is set to development of polymer-composites, e.g. as coatings for maritime applications, as well as to the development of special bonding-technology for high performance metal alloys based on aluminum and titanium.

Organization Type

Company

Areas of Activities

Research cooperation

Distribution services

Offer

Material Science for maritime and industrial Purposes

Cooperation Offered

1. Shipbuilding
2. Maritime Innovations
3. Marine technology
